Training Provided By

IMPACT FUTURES

# You will learn how to:

## Support individuals with daily living activities

Achieve the tasks and responsibilities of your job role

Support with individuals' social activities

Monitor health

Assist with eating, mobility and personal care, according to the individual's personal care/support plan

Access, follow and be compliant with regulations and organisational policies and procedures

## Develop yourself

Understand your professional boundaries and limits of your training and expertise

Ask for help from an appropriate person when not confident or skilled in any aspect of your role

## Implement person-centred care plans

Provide individuals with information to enable them to have choices about the way they are supported, ensuring compliance with the relevant statutory standards and codes of practice for your role

Understand the 'duty of care' in practice

Encourage individuals to participate in the way their care and support is delivered

Contribute towards the development and creation of care plans which are underpinned by the individual's support preferences

Identify, respond to and escalate changes to the physical, social, and emotional needs of individuals, contributing to the ongoing development of care/support plans and support with cognitive, physical or sensory impairments

**Community pathway also available**
